

CLASSIC DART

Use this whole sheet. Do not cut it.

Print at 100% or Actual size

Follow the illustrated guide on page 2

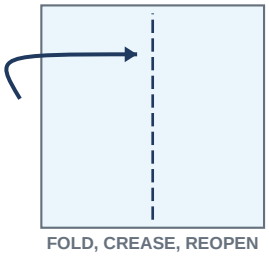

HOW TO FOLD A CLASSIC DART

Use page 1 as the aeroplane. Keep this page beside you as the guide.

BEFORE YOU START Keep page 1 flat. Lightly pre-crease every dashed line, then reopen it.

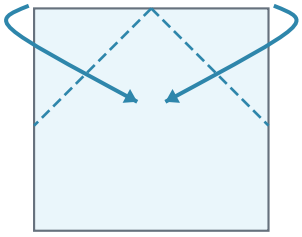

The crease direction does not matter yet. This keeps every guide usable after other folds cover the printing.

1 Make the centre crease

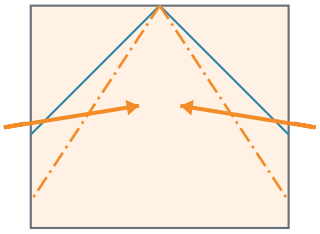

Fold line 1 lengthways. Press the crease, then reopen the sheet completely.

2 Fold in the top corners

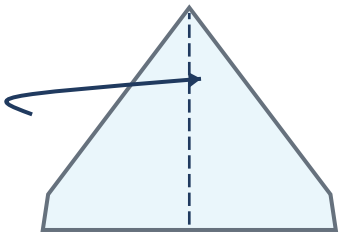

Fold both corners on lines 2. The top edges should meet neatly along the centre crease.

3 Sharpen the nose

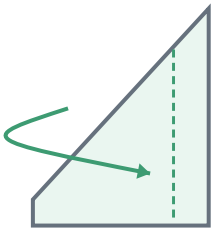

Fold the two new sloping edges inward on lines 3 so they meet at the centre.

4 Close the body

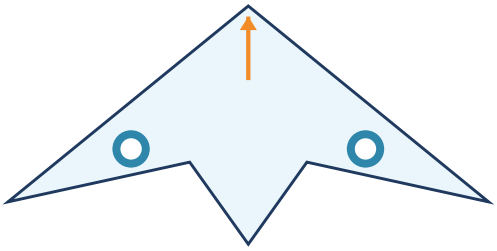

Fold the whole aeroplane in half on the centre crease, with the folded layers outside.

5 Fold down both wings

Fold one wing down on line 5. Turn the plane over and repeat, matching the first wing.

6 Level the wings and fly

Open both wings until they are level. Hold the body underneath and launch gently forward.

FLIGHT TIP If it dives, bend both rear wing edges up very slightly. If it stalls, flatten them again.
