HOW TO FOLD A STUNT PLANE

Use page 1 as the aeroplane. Keep this page beside you as the guide.

BEFORE YOU START Lightly pre-crease every dashed line, including both pink TUNE lines.

Reopen the sheet after each crease. The direction does not matter until the numbered folding steps below.

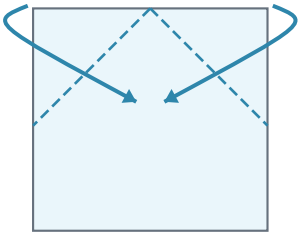

1 Make the centre crease

FOLD, CREASE, REOPEN

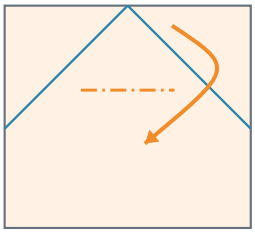

Fold line 1 lengthways. Press the crease, then reopen the sheet completely.

2 Fold in the top corners

Fold both corners on lines 2. The top edges should meet neatly along the centre crease.

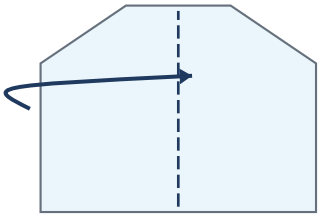

3 Weight the nose

FOLD THE POINT DOWN

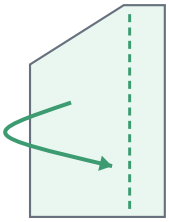

Fold the pointed nose down on line 3. Press firmly so the short, weighted nose stays flat.

4 Close the body

Fold the whole aeroplane in half on the centre crease, with the folded layers outside.

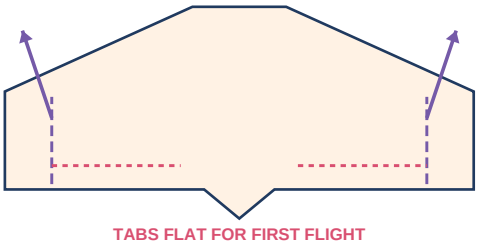

5 Fold down both wings

FLIP OVER AND REPEAT

Fold one wing down on line 5. Turn the plane over and repeat, matching the first wing.

6 Raise the winglets

TABS FLAT FOR FIRST FLIGHT

Fold both narrow tips upward on lines 6. Keep the pink rear TUNE tabs flat for the first flight.

STUNT SETTINGS **STRAIGHT** tabs flat **LOOP** both tabs up 5-8 mm **CURVE** raise the tab on that side

Make tiny bends and test after each change. Launch level for curves; launch slightly upward for a loop.
